James Youngquist

Senior Full Stack Software Engineer

Software engineer with a background in economics. I have 5 years of industry experience and 2 years in academic research environments. I am friendly, an excellent communicator, and a good fit for any team with a high execution standard. I genuinely love programming, and I have a track record of writing code that makes money.

Hue IQ

Seasonal color analysis tool

- Peaked at #2 iOS paid lifestyle category on App Store

EXPERIENCE HIGHLIGHTS

Sr. Full Stack Engineer | Invert Bio (YC W22) | 2024-Apr 2026

- Improved AI product capabilities by introducing skills concept to agentic loop
- Architected and shipped AI-powered visual data summarization feature that is now a key fixture of product demos to potential enterprise customers
- Tripled our potential customer base by working with a cross-company “strike force” to upgrade our data model
- Shipped numerous UI/UX improvements

Sr. Full Stack Engineer | Upsolve.ai (YC W24) | Jan-Aug 2024

- Collaborated with a team of three to bring complex, AI-powered analytics software from 0 to 1
- Designed and implemented natural-language-based user interface elements
- Designed and developed a tenancy-based security system to ensure data segregation between different SaaS customers
- Developed and implemented FE data visualization components based on customer asks

Full Stack Engineer | Inflow (YC S21) | 2023

- Designed and built robust task scheduling and version control system
- Refined UX by integrating haptics on both iOS and Android apps
- Developed and maintained both internal tools and client-facing systems

Principal Developer | The Trucking App, Haul’r Corp | 2022-2023

- Developed proprietary fleet management and GPS tracking system for large-scale construction projects
- Led small, distributed team of developers and designers
- Oversaw hardware distribution to testers
- Represented engineering with management and investors

Freelance Software and Hardware Developer | 2021-2022

- Built custom software and hardware for interactive art installations
- Worked with clients on custom website development, design, and administration

CS Teaching Assistant | University of Groningen, Rutgers | 2018, 2022
